

Dear Dr. Green,

Robert Goddard is a school that may get overlooked because our students, as a whole make AYP. However our male students are in need of life skills and leadership skills that go beyond the classroom. By providing a male authority figure in the lives of young males, we hope to help foster friendships and guide them to a successful transition during their academic career and future endeavors.

Robert Goddard French Immersion and Montessori School has 496 males enrolled, of those males 367 are African American. The instructional staff is primarily female; the administration consists of two female Principals and one female Assistant Principal. Several of the students have found themselves receiving disciplinary actions that could have been avoided by having coping and life skills that include restraining anger, respect, self-confidence, and strong decision making.

We would very much appreciate your support with the implementation of the Brotherhood & Leadership Program. I would like to arrange a meeting with the representatives of the Program and begin discussing the possibility of the program being offered at Robert Goddard. Your support is being requested in an effort to increase attendance, cultural awareness, and responsibility through the Brotherhood & Leadership Program.

Thank you for your dedication to our students.

Robyn D. Jones
